UMAR ORAKZAI

Full Stack and Blockchain Developer

Islamabad, Pakistan | +92 342 5208878 | umarorakzai98@gmail.com
github.com/Umark98 | linkedin.com/in/umarkhan14101

Professional Summary

Full-stack and blockchain developer with about four years of experience across web applications, AI-assisted products and Web3. Currently contributing to Greer, a private AI growth and relationship-management platform. Experience includes Next.js interfaces, backend APIs, background workers, local LLM integration, Sui NFT contracts and wallet-connected applications.

Professional Experience

Greer | Full-Stack SaaS Developer Feb 2026 - Present

Private AI growth product

- Develop web interfaces, backend APIs and workflow reliability for a locally hosted platform bringing together conversational AI, content planning, research, CRM and relationship management.
- Work with Next.js, TypeScript, PostgreSQL/pgvector and Redis/BullMQ for application features, retrieval-augmented memory and background processing.
- Contribute to Ollama local-model integration and configurable LLM routing, with workflows for drafting, scheduling, growth experiments and funnel tracking.
- Support review and approval states, operational controls and audit trails around AI-assisted workflows.

Game Nock | Blockchain and Web Developer Aug 2025 - Early 2026

Rawalpindi, Pakistan

- Developed Sui NFT functionality, including creator-defined collection supply and individual on-chain minting for collectors.
- Integrated Sui NFT collections, smart contracts and WalletConnect for GEMA, including legacy-user claims, email and wallet updates, and age-gate verification.
- Built Sui Move contracts, Web3 interfaces and backend services supporting NFT operations.

Cybill Nerd | Front-End Developer Feb 2023 - Jul 2024

Rawalpindi, Pakistan

- Built a crypto charity donation interface using Next.js and Tailwind CSS, with wallet connections for on-chain donations.
- Worked with blockchain and backend developers to deliver responsive interfaces across devices.

Independent Projects and Side Work

Selected projects and freelance engagements alongside primary roles.

Dog Laika | Founder and Full-Stack Blockchain Developer Side project

doglaika.com

- Built a crypto and NFT application with a BEP-20 token on BNB Chain, tokenomics and distribution workflows, ICO launchpools and a custodial exchange.
- Developed Next.js/React interfaces, integrated the Transak fiat on-ramp and implemented settled on-chain payment verification.

Blast Wheels | Full-Stack and Sui Blockchain Developer Side project

blast-wheels.com

- Developed the frontend, backend, Sui NFT contracts, blockchain integration and application security for an NFT-based racing platform.
- Integrated the web platform with the WebGL game, which was created by another developer.

Freelance | Full-Stack and Blockchain Development From 2024

- Delivered selected side engagements involving NFT marketplaces, transaction workflows, responsive interfaces and administration tools.

Technical Skills

Web: TypeScript, JavaScript, React, Next.js, Tailwind CSS, responsive interfaces

Backend and data: Node.js, REST APIs, PostgreSQL, pgvector, Redis, BullMQ

AI integration: Ollama, local LLM integration, retrieval-augmented generation, configurable model routing, AI workflow integration

Blockchain: Solidity, Sui Move, Sui, BNB Chain, NFTs, BEP-20, WalletConnect, Web3.js, Ethers.js

Tools: Git, Docker, Postman

Education

Bachelor of Science in Information Technology | 2020 - 2024

International Islamic University, Islamabad
